

Rocky Christian School has moved from holding a Science Fair to what we call a School Fair. It is our intention to show parents, grandparents and other community members a variety of skills taught within our school programs. Each grade is given a special assignment, including Research Projects, Public Speaking, and Science Fair Projects. We also display Art, Creative Writing, Bible Projects and anything else that may be of interest to the public. The evening of the School Fair is wrapped up with a School Program that includes singing, skits, readings from students, etc. This has proven to be a huge success for many years.
